

Israel S. Sanchez

Houston, TX | 832-643-8895 | Israel.pro1994@gmail.com | Github: [ISANCEHZ1994](#) | [My Portfolio](#) | [LinkedIn](#)

Full Stack Developer

A software engineer who wants to use his collaborative skills to solve technological problems. Proven track record of meeting deadlines and working effectively under pressure. Hardworking, energetic, self-taught and highly capable. My communication, people-centric nature and eagerness to please has afforded me excellent interpersonal skills.

TECHNICAL SKILLS

JavaScript(ES6), **Ruby on Rails**(with Active Record), **HTML5/CSS3**, **M.E.R.N** Stack Development (MongoDB, Express, React(**Redux**/Hooks) Node.js), PostgreSQL, **MySQL**, JS-TDD(Test Driven Development), **Java**, Springboot, **Angular TypeScript**, jQuery, REST API, JWT Token, OOP, JSON, Eclipse, VSCode, IntelliJ, GitHub

PROJECTS

Your Pic - [GitHub](#) | [Video](#)

Your Pic is a client based scheduling application. Clients can find a photographer best suited for their specific needs.

- Implemented a Ruby on Rails backend with PostgreSQL for storage
- Used JWT Authentication to remember the client and to store client information in the backend
- Redux used to manage state database and place wherever needed

Phone Weather App - [GitHub](#) | [Demo](#)

A user can view and search for a specific location's weather. NOTE: for better view, toggle device toolbar to Phone

- Used React and CSS3 for animated styling - background should change depending on the temperature of location
- Created with functional components to have access to React's Hooks for (arguably) faster functionality

Portfolio - [GitHub](#) | [Demo](#)

A portfolio created by using CSS3 and HTML5 to display projects as well as give a better description of who Israel Sanchez is as a potential employee.

- Displays a list of completed projects with a brief description
- Employs GitHub Pages to ensure a functioning site

EXPERIENCE

Freelance Software Developer (Full Stack), Remote, Houston, TX Present

Amigos Residential Service - Oct 2020 - Nov 2020 (One Month)

- Established JavaScript and HTML/CSS site for AC repair company.

Fortress Fabrication Inc. - Jan 2021 - March 2021 (Two Months)

- Created a React with MySQL site for metal fabrication shop to help save clients and display CNC work.

Seasonal Fulfillment Associate (Stower), Amazon, Houston, TX 07/2020 - 12/2020

Transported various products in a specific 'pod' or shelf, quickly following computerized schema.

- Recognized for minimal human errors and damage.
- Quality over quantity - precise as possible with as little errors as possible.

Machine Operator (Forklift Driver, CNC, Crane, TableSaw), Park USA, Houston, TX 02/2014 - 08/2019

Transported material to designated areas via forklift and crane. Created custom metal pieces using TableSaw and CNC.

- Constantly created accurate finished pieces to customers specifications despite encountering constant deadline and specification changes. Learned communication skills, time management, and effectively work under pressure

EDUCATION

Woz-U, (REMOTE) Houston, TX 01/2021 - 03/2021

8 week program where participants learned how to create fully functioning sites using popular technologies such as Java(8), Springboot, Angular, MySQL, and Amazon Web Services(AWS).

Graduate Flatiron School, Houston, TX 08/2019 - 01/2020

Completed 5 month full-time immersive experiential, software engineering bootcamp focused on Ruby, Ruby on Rails, JavaScript, React and Redux to build modern full-stack web applications.
